SUMMARY

I'm Joe, a full-stack developer with whose passion has been writing code and making websites that are both responsive and functional for more than 5 years. My front-end code mainly consists of plain HTML, Sass, and jQuery; my back-end code is composed of PHP with the occasional use of a framework. I'm an abnormally quick learner that is willing to learn anything and capable of adapting to any situation. I'm able to meet tight deadlines under stressful circumstances.

EXPERIENCE

Programming Intern, Aspen Dental

Syracuse, NY — June 2015 – September 2015

Accomplishments

- Responsible for both back-end and front-end services.
- Designed and coded an administration panel.
- Utilized C, C++, C#, ASP.NET, HTML, jQuery, Javascript, and Sass.

Freelance Web Developer

Since 2011

Accomplishments

- Design websites from the bottom up.
- PHP, MySQL, HTML, Bootstrap, jQuery, SCSS, and Javascript.
- Developed custom admin panels without the use of frameworks.

Projects
